

? THE SPY CHALLENGE ?

This activity is incredibly fun and appeals to the James Bond in us all! The challenge starts with delegates working together to graduate through 'Spy School' where they learn about code breaking, ciphers, observations and reconnaissance, map reading and problem solving.

Teams are briefed that their 'mission' is to retrieve important information to prevent a terrorist group from hacking top secret launch codes to Britain's nuclear arsenal.

Using a combination of I-pads with a geo location based app, maps and a code decipher manual, each team must work through their manual. This requires them to look for clues and complete espionage, code breaking and surveillance tasks in specific locations. Points are awarded for each section of the manual completed, and when all teams meet back at HQ we announce the scores and prizes are awarded to the winners.

DURATION:
3 hours – Full day

THEMES:
Risk management, creativity, innovation, arithmetic, coding, communication, leadership, problem solving, fun

ENVIRONMENT:
Indoor, Outdoor

FUNCTION:
Team building, networking
